  2014 - 2017

Hard skills

C#

Unity

Git

Office

JIRA

Summary

Solo game developer. Proficient in Unity and C#. Experienced with Git and Rider. Looking to turn my passion into a career.

Projects

Solo Project, BR[E]AcKeys OUT! (Brackeys Jam 24.1)
- Managed the creation of a finished and polished project within a strict deadline of 1 week
- Used a well-structured and planned approach to leave enough time for playtesting and implementation of changes based on user feedback
- Focused on delivering a bug free and polished end product by testing each feature as it was implemented

Solo Project, Looper
- Planned the entire project from the concept to the final implementation
- Researched and implemented multiple different mechanics, such as player controller and progression tracking
- Documented playtester feedback and implemented bug fixes and gameplay changes

Work

Parcelsorter at the Airport Cologne/Bonn, United Parcel Service
2022 - Present

Hobbies

- Street photography
- Game development
- Gaming
